

PT-125 PIERCE & TEAR SERIES

The PT-125 Pierce & Tear Series was purpose-built to efficiently destroy documents in a 26,000 GVW footprint all while maintaining our strict standards of quality. Shredfast created the PT-125 to provide a cost-effective non-CDL shredder that maximizes production capability. With the PT-125, you'll get legendary Shredfast quality, design and customer service as standard features.

Shredfast is known as the industry leader in mobile shredding technology. The PT-125 includes many design innovations that have made Shredfast vehicles the choice of the industry for over 17 years. They include a conveyor feed system to maximize throughput, a custom-built hydraulic shredder, side-mounted grip tipping assembly, integrated state-of-the-art hydraulic controls, and a one-of-a kind touchscreen control panel for ease of operation.
